

Measurable Productivity Improvements

We conducted a pre and 30 day post dictating survey. We asked:

- 1) On a scale of 1-10, how does documenting patient care rank in impacting your daily stress?
- 2) Approximately how much time do you spend each day documenting patient care?

The results are significant in that they:

- 1) Reduce daily stress
- 2) Freed valuable time
- 3) Increased office productivity
- 4) Reduce repetitive stress impact
- 5) Help improve quality of life
